

- Indoor / Outdoor installations
- Thick extruded aluminium and stainless steel armour plating
- Epoxy painted
- Internal cable channel
- Weatherproof standard IP54

Armoured housing, consisting of a 10mm thick extruded aluminium base with front and rear bottom made of 30mm thick die-cast aluminium. An 18mm-bullet-proof glass is fixed on the front by means of an iron frame. The armour plating is made of 3mm stainless steel sheet, which covers the base and housing body. The unit is completed with an aluminium sunshield. Complete protection is ensured by the special AVBPWPBB joint bracket, made of die-cast aluminium, with internal cable channel for concealed power and video cables.

A nut and a lock nut allow the joint adjustment and locking. The bracket can be wall mounted by means of its reinforcing support plate.

The range of accessories includes standard sunshield and heater kit, and optional blower kit and power supply.

The AVBPH housing has been designed for maximum security applications, like prisons, where there is the need of maximum protection against vandalism.

The values are in millimeters.
