IR50

IR300

The infrared illuminators from Videotec allow the generation of high quality images during the night surveillance to TVCC cameras sensitive to infrared rays.

IR infrared illuminators are made from die-cast aluminium; painted with epoxy polyester; they ensure high protection and environmental adaptability.

The infrared beam has a wavelength of 850nm. IR illuminators are assembled with stainless steel screws and "O" rings which guarantee a IP66 weatherproof standard (IP65 for IR300).

Lamps with different light beams (spot, flood, wide flood) are available.

They're recommended for military surveillance, perimeter surveillance, airports and prisons.
